## 1. System

### 1.1 New bid

**Use case:** New bid - push notification

**Actor:** Application

**Goal in context:** Notify user to take action.

**Pre-Condition:**

1. User puts the item on sale.
2. Zapato user has to have internet connected Android.
3. Zapato Android background service has to have not been killed by Android user (e.g. Samsung or HTC or Huawei smartphone having too much battery drain so user elects to use process killer to kill services that seem unnecessary to conserve power out of frustration (without knowing some apps need them e.g. Zapato) and turns out Zapato background service was also killed so the push service from Zapato server fails to communicate). (Because bidding is time critical user will start to complain if the push notification is not reliable, so give hint to user if they don't receive push notification for some reason for troubleshooting app problem)
4. Item has few hours or few minutes left before bid expiration (e.g. in physical bidding room the announcer says going once... going twice... sold!).
5. If bidding has low participation counts (so the profit for the seller might be too low), then check people interested in buying similar item and notify them even if they have not actively searched for the item.

**Post-Condition:** Alert message received in the system.

Android transmits acknowledged signal to server and server receives the signal and clears the alert.

**Events:**

1. Zapato Head Honcho Android push service is activated through google play services provided with Google developer accounts services activation code.
2. OAuth google account verification for Zapato app.

## 1.2 New message

**Use case:** New message - push notification

**Actor:** Application

**Goal in context:** Notify user to take action.

**Pre-Condition:** User's contact method is publicly displayed.

Similar to (New bid - push notification) Zapato Android background service must be on.

As soon as user Android connects to stable internet email like messages (not sms like messages) within the Zapato system prepares to sync up to last ~20 messages (sent/received)

**Post-Condition:**

1. Text message received in the system. Server side generate hash for current message counts and data size. Android side generate hash for current message counts and data size.
2. Android and server compare the hash (sub 20 Kbyte data transmission SHA256 or similar) to ensure the message (data packet parcel) are synced.

**Events:**

1. The user's device received messages from other devices.
2. System send the alert to display screen.
3. Zapato Head Honcho Android push service is activated through google play services provided with Google developer accounts services activation code.
4. OAuth google account verification for Zapato app.

## 2. Peer 2 Peer

### 2.1 Message Seller

**Use case:** Message Seller**Actor:** User**Goal in context:** To contact the Seller by sending messages in the app.**Pre-Condition:** User login in, and User is in the view seller profile when user are in the product detail screen. User has intent to use the Zapato app and keep browsing information or purchase or user is just checking out Zapato app or user just wants to kill his/her time logging into random apps.**Post-Condition:** User login in, and User is in the pop-up window when the user are in the Bid List and click on the bid product. User data syncs up. App internet communication protection is verified for purchase and sales.**Events:**

1. Click on "Message Seller" option from the seller profile screen
  - a. If the user does not login in, it will pop out a login in box
  - b.
2. Message is written and message is temporarily saved.
3. Message is sent.
4. User sends the message
5. User receives reply message about the message from the seller
6. User receives reply from Zapato admins if seller does not reply for 3 or more days.

## 2.2 Message buyer

<b>Use case:</b> Message Buyer
<p><b>Actor:</b> User</p> <p><b>Goal in context:</b> To contact the Seller by sending messages in the app.</p> <p><b>Pre-Condition:</b> User login in, and User is in the pop-up window when the user are in the Bid List and click on the bid product. User has intent to send message about the question or the shipping (failed/successful) or inquire about negotiation of price adjustment.</p> <p><b>Post-Condition:</b> Original message gets copied to user's "sent" message box. Message reaches the seller that the user elected to send message to.</p> <p><b>Events:</b></p> <ol style="list-style-type: none"> <li>1. Seller has received messages about the item he/she/group sold</li> <li>2. Seller has decided what to do for the inquiry from the buyer and writes the decision in the message</li> <li>3. Message is written and message is temporarily saved.</li> <li>4. Message is sent.</li> <li>5. After user receives the decision and have made decision about the seller's decision (e.g. accept/decline/report to admins) user sends message back to seller. If no more issue or no more reply then can implicitly and by inspection imply case is resolved.</li> <li>6. Back and forth message from buyer and seller until k'th (<math>K=1,2,3,\dots</math>) transmission where problem is resolved or seller is reported to Zapato admins.</li> </ol>

## 2.3 Report a user

<b>Use case:</b> Report a user
<p><b>Actor:</b> User</p> <p><b>Goal in context:</b> To send a complaint against the person to the admins</p> <p><b>Pre-Condition:</b> User is in the profile of the person. Admins must not be corrupt to be willing to investigate and resolve Zapato service customer disputes. If Zapato service gets reputation for slow customer service user will likely not try to use this feature as time goes on.</p> <p><b>Post-Condition:</b> A complaint is sent about the person to the admins</p> <p><b>Events:</b></p> <ol style="list-style-type: none"> <li>1. Scroll down from the person's profile</li> <li>2. Click on "Report"</li> <li>3. Click on the list of available offenses.</li> <li>4. Write optional sentences that happened to report this person</li> <li>5. Click "Submit"</li> </ol>
<p><b>Extensions:</b></p> <p>2a. If not logged in</p> <p>2b. Taken to login screen</p>

## 3. Product Browsing

### 3.1 Bid a product

<b>Use case:</b> Bid Product
<b>Actor:</b> User <b>Goal in context:</b> User want to place a bid for a product for a low price <b>Pre-Condition:</b> User login in his/her account, and user are in the product detail screen. Or the user login in his/her account, and user are in the Bidlist screen ( under ViewBid) <b>Post-Condition:</b> User does not login in, and the user are in the product detail screen or Bidlist screen. <b>Events:</b> <ol style="list-style-type: none"><li>1. From the product detail screen, click on the “Bid” button.</li><li>2. Pop out a check Box of “Agree to payment obligation”, Click “Yes” to continue.</li><li>3. User enter a valid bid amount</li><li>4. User Click “Submit” for finishing bid product</li></ol>
<b>Extensions:</b>

### 3.2 Buy product

<b>Use case:</b> Buy Product
<b>Actor:</b> User <b>Goal in context:</b> User want to buy the product now. <b>Pre-Condition:</b> User login in his/her account, and user are in the product detail screen. <b>Post-Condition:</b> User does not login in, and user are in the product detail screen. <b>Events:</b> <ol style="list-style-type: none"><li>1. From the product detail screen, click “Buy Now” button.</li><li>2. User input his/her shipping address, or user uses the save address.</li><li>3. user login in his/her Paypal account</li><li>4. User choose a linked bank account, or user input the card information.</li><li>5. User click “Confirm” to confirm purchases.</li></ol>
<b>Extensions:</b>

### 3.3 Sell product

<b>Use case:</b> Sell Product
<b>Actor:</b> User <b>Goal in context:</b> User wants to sell a product <b>Pre-Condition:</b> User has registered account and User has logged in. <b>Post-Condition:</b> User creates a listing to sell their product <b>Events:</b> <ol style="list-style-type: none"><li>1. From any screen, User taps and holds the home button on the lower left corner</li><li>2. User swipes up to the camera icon</li><li>3. User takes photo(s) or selects photo(s) of product</li><li>4. User creates product listing title and product description</li><li>5. User selects product condition</li><li>6. User selects to put product for sale or bid</li><li>7. User sets the price for sale/bid</li><li>8. User inputs paypal email</li><li>9. User selects to creates sell Product listing</li></ol>
<b>Extensions:</b>

### 3.4 Search product

<b>Use case:</b> Search Product
<b>Actor:</b> User <b>Goal in context:</b> User has searched for a product they were looking for <b>Pre-Condition:</b> User has to be at the main screen <b>Post-Condition:</b> User is seeing their product that they searched <b>Events:</b> <ol style="list-style-type: none"><li>1) From the main screen, user taps and drags the screen down.</li><li>2) With their finger still on the phone, they drag their finger to the left and let go.</li><li>3) This will show a search bar and a keyboard where the user can type what they want to search.</li><li>4) After confirming their typed word(s), they tap enter and their product(s) will appear.</li></ol>
<b>Extensions:</b>

### 3.5 Filter products

<b>Use case:</b> Filter Products
<b>Actor:</b> User <b>Goal in context:</b> User has filtered the products to their preference <b>Pre-Condition:</b> User has to be at the main screen <b>Post-Condition:</b> User is seeing their filtered products <b>Events:</b> <ol style="list-style-type: none"><li>1) From the main screen, user taps and drags the screen down.</li><li>2) With their finger still on the phone, they drag their finger to the right and let go.</li><li>3) This will take them to a page with pre-determined categories.</li><li>4) Tapping on one will show them products that only belong in that category</li></ol>
<b>Extensions:</b>

### 3.6 Add to favorites

<b>Use case:</b> Add to Favorites
<b>Actor:</b> User <b>Goal in context:</b> User wants to add a product to their Favorites list <b>Pre-Condition:</b> Product is not currently in Favorites list and User is at main screen <b>Post-Condition:</b> User can see the product in the Favorites list <b>Events:</b> <ol style="list-style-type: none"><li>1. User browse for a product</li><li>2. Selects a product for detailed information</li><li>3. User selects the add to Favorites icon</li><li>4. Product is added to favorites list</li></ol>
<b>Extensions:</b>

## 4. Payment Processing

### 4.1 Payment method

**Use case:** Choose payment and confirm order - credit card ({VISA, Master}, {Paypal, Venmo})

**Actor:** User

**Goal in context:** Securely make money transfer to seller for the item one purchases.

**Pre-Condition:**

1. User has not chosen default payment method or first time purchasing with Zapato.
2. User has intent to change payment method for the purchase.
3. User has intent to make purchase and has moved into proceed to purchase.
4. User is debating whether to buy or not and checking out how the shipping fees and taxes will add up.

## 4.2 Shipping address

<b>Use case:</b> Choose Shipping Address
<b>Actor:</b> User <b>Goal in context:</b> Confirm the shipping destination <b>Pre-Condition:</b> <ol style="list-style-type: none"><li>1. User has not chosen a default shipping address.</li><li>2. User intended to change shipping address</li><li>3. User has intent to add more shipping address</li></ol> <b>Post-Condition:</b> <ol style="list-style-type: none"><li>1. New shipping address is successfully added to user's account</li><li>2. The chosen shipping address carries throughout the current purchase session.</li></ol> <b>Events:</b> <ol style="list-style-type: none"><li>1. Address is added</li><li>2. Address is deleted</li><li>3. Address is modified</li></ol>
<b>Extensions:</b> <ol style="list-style-type: none"><li>1. APO military address instructions and agreements and statements whether seller ships to APO address.</li></ol>

## 5. Profile

### 5.1 Login

Use case: Login to account from Start Screen
<p><b>Actor:</b> User</p> <p><b>Goal in context:</b> Login to registered Zapato account</p> <p><b>Pre-Condition:</b> User has a Zapato account, is not logged in yet, and is at the Start Screen.</p> <p><b>Post-Condition:</b> User has logged into account, and is at Main Screen</p> <p><b>Events:</b></p> <ol style="list-style-type: none"><li>1. Click on "Login" option from Start Screen</li><li>2. Enter email and password</li><li>3. Confirm login information</li><li>4. Click "OK" to continue</li></ol> <p><b>Extensions:</b></p> <ol style="list-style-type: none"><li>1. Registration verification (e.g. click emailed verification link).</li><li>2. Registration captcha to guard robot registration.</li></ol>

### 5.2 Log out

Use case: Log out
<p><b>Actor:</b> User</p> <p><b>Goal in context:</b> User logs out from current logged in account</p> <p><b>Pre-Condition:</b> User has a Zapato account is logged in, and is at the Main Screen. <b>Post-Condition:</b> User has logged out is at the Main Screen.</p> <p><b>Events:</b></p> <ol style="list-style-type: none"><li>1. Click Profile</li><li>2. Click Log Out</li><li>3. Log Out prompt appears</li><li>4. Click Yes to log out</li></ol> <p><b>Extensions:</b></p>

## 5.3 Change password

**Use case:** Change password

**Actor:** User

**Goal in context:** Change user password to new password

**Pre-Condition:** User is logged in and at the Main Screen

**Post-Condition:** User password is changed

**Events:**

1. Click Profile icon
2. Click “edit profile” option
3. Click “change password” option
4. Receive 6-digit verification code through email
5. Enter verification code into specified field
6. Enter and confirm new password
7. Save Changes

**Extensions**

- 1a. User is not logged in
  1. Send user to login screen and have them log in
  2. Continue use case at step 2
- 5a. Incorrect/outdated verification code entered
  1. Display error message “Incorrect code entered”
  2. Click “Send new code”
  3. Continue use case at step 4

## 5.4 Update username

Use case: Update username
<p><b>Actor:</b> User</p> <p><b>Goal in context:</b> Change username associated with account</p> <p><b>Pre-Condition:</b> User is in Main Screen</p> <p><b>Post-Condition:</b> Username is changed</p> <p><b>Events:</b></p> <ol style="list-style-type: none"><li>1. Click Profile icon</li><li>2. Click "Edit Profile"</li><li>3. Click "Change Username"</li><li>4. Enter New Username</li><li>5. Save Changes</li></ol> <p><b>Extensions:</b></p> <ol style="list-style-type: none"><li>1. Can make username to be the email address (e.g. Amazon account, Ebay account, Blizzard account, etc.)</li><li>2. If "Extensions" item 1 is met above then user account can be transferrable. Account based on user email address verification when user wants to transfer user account for prolonged account usage without creation of new account (e.g. user doesn't like the account name (for some reason) so user wants to change the account name).</li></ol>

## 5.5 Update delivery address

Use case: Update Delivery Address
<p><b>Actor:</b> User</p> <p><b>Goal in context:</b> Change the delivery address of the user</p> <p><b>Pre-Condition:</b> User is in Main Screen</p> <p><b>Post-Condition:</b> User's delivery address is changed</p> <p><b>Events:</b></p> <ol style="list-style-type: none"><li>1. Click Profile icon</li><li>2. Click "Edit Profile"</li><li>3. Click "Change Delivery Address"</li><li>4. Enter New Delivery Address</li><li>5. Save Changes</li></ol> <p><b>Extensions:</b></p> <ol style="list-style-type: none"><li>1. User can add multiple addresses to quickly choose when purchasing.</li><li>2. User can choose individual address to ship to individual item to individual locations in a single transaction (given that per transaction can contain multiple items (e.g. multiple count of same item but want to send to different address for this app which has no cart)</li></ol>

## 5.6 Update email address

<b>Use case:</b> Update email address
<b>Actor:</b> User <b>Goal in context:</b> Change email address of the user <b>Pre-Condition:</b> User is in Main Screen <b>Post-Condition:</b> User's email is changed <b>Events:</b> <ol style="list-style-type: none"><li>1. Click Profile icon</li><li>2. Click "Edit Profile"</li><li>3. Click "Change Email Address"</li><li>4. Enter new email address</li><li>5. Save changes</li></ol> <b>Extensions:</b> <ol style="list-style-type: none"><li>1. Buyer email and seller email account can be different.</li></ol>

## 5.7 Verify email address

<b>Use case:</b> Verify email address
<b>Actor:</b> User <b>Goal in context:</b> Verify user input email address <b>Pre-Condition:</b> User is in sign-up screen <b>Post-Condition:</b> User is in Main Screen with a registered account <b>Events:</b> <ol style="list-style-type: none"><li>1. User has inputted all of their information necessary to make an account</li><li>2. Click "Submit"</li><li>3. "Verify Email" screen, Text box is displayed</li><li>4. User has to verify email with a code sent to their address</li><li>5. User writes the code within text box</li><li>6. Click "Submit"</li><li>7. Email has been verified</li></ol>
<b>Extensions:</b> 3a. If User exits verify email screen <ol style="list-style-type: none"><li>1. User is in Main Screen</li><li>2. Click Profile Icon</li><li>3. Click "Verify Email" on top</li></ol>

## 5.8 View selling list

<b>Use case:</b> View selling list
<b>Actor:</b> User <b>Goal in context:</b> Switch screen to view list of all products User is selling <b>Pre-Condition:</b> User is in Main Screen and logged in. <b>Post-Condition:</b> Favorite items screen is the current displaying screen <b>Events:</b> <ol style="list-style-type: none"><li>1. Click profile icon</li><li>2. Click Listing icon</li><li>3. Click Sell List</li></ol>
<b>Extensions:</b>

## 5.9 Remove product from selling list

<b>Use case:</b> Remove sell listing
<b>Actor:</b> User <b>Goal in context:</b> User wants to remove listing of their product for sale <b>Pre-Condition:</b> User has placed product on sale and the item has not been sold yet. The User is signed in. <b>Post-Condition:</b> The product put on sale has been removed from the sale listing <b>Events:</b> <ol style="list-style-type: none"><li>1. Click profile icon</li><li>2. Click Listing icon</li><li>3. Click Sell List</li><li>4. Click Remove</li><li>5. Click Product to remove</li><li>6. Confirmation prompt appears</li><li>7. Click Yes to confirm removal</li></ol>
<b>Extensions:</b>

## 5.10 Create product in sell listing

<b>Use case:</b> Create sell listing
<b>Actor:</b> User <b>Goal in context:</b> User want to create a sell listing of his/her product for sale <b>Pre-Condition:</b> User login in, and User is in the Main Screen <b>Post-Condition:</b> Add listing screen is the current displaying screen <b>Events:</b> <ol style="list-style-type: none"><li>1. Click profile icon</li><li>2. Click Listing icon</li><li>3. Click Sell list</li><li>4. Click Add Listing icon</li><li>5. Input the product title</li><li>6. Upload the product picture</li><li>7. Input the product description</li><li>8. Input the product detail(condition, color, brand, etc)</li><li>9. Select sell now or bid</li><li>10. Input the Paypal account</li><li>11. Click submit button for finishing Create sell listing</li></ol>
<b>Extensions:</b>

## 5.11 View favorite list

<b>Use case:</b> View favorite list
<b>Actor:</b> User <b>Goal in context:</b> User wants to switch screen to view all favorite items <b>Pre-Condition:</b> User is in Main Screen. The User is logged in. <b>Post-Condition:</b> Favorite items screen is the current displaying screen <b>Events:</b> <ol style="list-style-type: none"><li>1. Click Profile icon</li><li>2. Click Listing icon</li><li>3. Click Favorites List</li></ol>
<b>Extensions:</b>

## 5.12 Remove favorites

<b>Use case:</b> Remove Favorites
<b>Actor:</b> User <b>Goal in context:</b> User wants to remove an item in their Favorites list <b>Pre-Condition:</b> User is in Main Screen. The user is logged in. The user has items in the Favorites list <b>Post-Condition:</b> An item is removed from the User's Favorite List <b>Events:</b> <ol style="list-style-type: none"><li>1. Click Profile</li><li>2. Click Listing</li><li>3. Click Favorites</li><li>4. Click Remove</li><li>5. Click Product to remove</li><li>6. Confirmation prompt appears</li><li>7. Click Yes to confirm removal</li></ol>
<b>Extensions:</b>

## 6. Settings

*All push notifications are enabled by default.*

### 6.1 Enable message notifications

<b>Use case:</b> Enable message notifications
<b>Actor:</b> User <b>Goal in context:</b> Change notification settings to turn on message notifications <b>Pre-Condition:</b> User in Main Screen and message notification is disabled <b>Post-Condition:</b> Message notifications are enabled for User <b>Events:</b> <ol style="list-style-type: none"><li>1. Click Settings</li><li>2. Click Notifications</li></ol> <b>Extensions:</b> <ol style="list-style-type: none"><li>1. Notifications for advertisements in the settings (e.g. subscriptions, favorite category, recommendation)</li></ol>

### 6.2 Disable message notifications

<b>Use case:</b> Disable message notifications
<b>Actor:</b> User <b>Goal in context:</b> Change notification settings to turn off message notification <b>Pre-Condition:</b> User in Main Screen <b>Post-Condition:</b> Message notifications are disabled for User <b>Events:</b> <ol style="list-style-type: none"><li>1. Click Settings</li><li>2. Click Notifications</li><li>3. Slide Message Notifications from On to Off</li></ol> <b>Extensions:</b> <ol style="list-style-type: none"><li>1. When message notification is switched off from setting kill Zapato Android background services from the apps system state to conserve unnecessary usage of battery in the background that will not be used after notification is chosen by user to not receive.</li></ol>

## 6.3 Change profile image

Use case: Change Profile Image
<p><b>Actor:</b> User</p> <p><b>Goal in context:</b> Replace the current profile image with another image</p> <p><b>Pre-Condition:</b> User in Main Screen</p> <p><b>Post-Condition:</b> Previous profile image is being replaced with another image</p> <p><b>Events:</b></p> <ol style="list-style-type: none"><li>1. Click Profile icon</li><li>2. Click "Edit Profile"</li><li>3. Click "Change Profile Image"</li><li>4. Upload new image from device</li><li>5. Save changes</li></ol> <p><b>Extensions:</b></p> <ol style="list-style-type: none"><li>6. Image size is too large, user needs to upload another one.</li></ol>

## 6.4 View help

Use case: View Help
<p><b>Actor:</b> User</p> <p><b>Goal in context:</b> User will see the help section of the app</p> <p><b>Pre-Condition:</b> User will be in the Main Screen</p> <p><b>Post-Condition:</b> User will be looking at the help section in the app</p> <p><b>Events:</b></p> <ol style="list-style-type: none"><li>1) User has to be at the Main Screen</li><li>2) User taps and drags home icon to "profile"</li><li>3) They click on the gear icon to head to settings.</li><li>4) Click on "Help"</li></ol>
<p><b>Extensions:</b></p>

## 6.5 View terms of service / Privacy policy

<b>Use case:</b> View Terms of Service/Privacy Policy
<b>Actor:</b> User <b>Goal in context:</b> User views the Terms of Service/Privacy Policy <b>Pre-Condition:</b> User in Main Screen <b>Post-Condition:</b> The Terms of Service/Privacy Policy is displayed <b>Events:</b> <ol style="list-style-type: none"><li>1. Click on profile</li><li>2. Click on setting</li><li>3. Click on View Terms of Service/Privacy policy</li></ol>
<b>Extensions:</b>

## 6.6 View application information

<b>Use case:</b> View Application Information
<b>Actor:</b> User <b>Goal in context:</b> User views the information of the application <b>Pre-Condition:</b> User are in the Main Screen <b>Post-Condition:</b> The application information is current display screen <b>Events:</b> <ol style="list-style-type: none"><li>1. Click Profile</li><li>2. Click Setting</li><li>3. Click View application information</li></ol>
<b>Extensions:</b>

## 6.7 Send feedback

<b>Use case:</b> Send Feedback
<b>Actor:</b> User <b>Goal in context:</b> User wants to send feedback for the Application <b>Pre-Condition:</b> User is in the Main Screen. <b>Post-Condition:</b> Feedback is sent to the application developers <b>Events:</b> <ol style="list-style-type: none"><li>1. Click Profile</li><li>2. Click Settings</li><li>3. Click Feedback</li><li>4. Prompt to type feedback appears</li><li>5. Type in feedback and select category of feedback</li><li>6. Click Send</li></ol>
<b>Extensions:</b>
